Tel. (479) 841-8635**

**MEMORANDUM**

**August 1, 2018**

**To: All Arkansas LP Gas Dealers**

**From: Sherman Murray Executive Director**

**Act 119 of 2007 Required Warning**

According to Act 119 of 2007, titled "An Act to Provide Affirmative Defenses to LP Gas Providers in Actions for Civil Liability", Section 2 (b) (2) (B) there is a mandated requirement that a reasonable warning against the consequences of misusing LP equipment be given for new, used or current LP equipment or appliances. This can be accomplished by the original manufacturer's information that is provided with the purchase of a new appliance or equipment by the customer, or by the LPG provider. The required warning is not limited to new equipment or appliances but extends to the tank, plumbing, leaks and existing appliances.

This requirement can be accomplished by using the attached "Important Notice" as a handout to each customer, and documented that it was done, including the customer signature. It is important for you to document the fact that you have provided this notice at all tank sets, all office visits and periodically, at least once a year, in a "flyer" or "mailer" and should be included with every statement or correspondence to all customers.

You may personalize the notice to include your company name and contact information by you using an office stamp in the space provided prior to giving out or by the direct printing of that information on the notice in that same space by our printer before shipping to you. Proof that the customer received the notice from you is your name on that notice that is in their hands.

The price for 1,000 cards with or without your company name imprinted will be \$80.00 including the delivery charge.
